

Programming with C (CSCI 112)

Classwork 1

Names: _____

In your small group...

Make sure you learn the name of everyone in your group! Then, discuss and write down answers to the following questions.

- What are the prerequisites of this course?
- Is everyone in your group a computer science or computer engineering major?
- What do you need to bring to class on a daily basis?
- Are you required to go to lab?
- How many total lab periods will there be?
- When is Lab 1 due?
- Suppose you turn in Lab 1 at 3:45pm on Sunday, September 3rd. What is the late penalty?
- Can you take quizzes online?
- What is the maximum number of bonus points you can earn in this class?
- What percent of your grade is each lab worth?
- What parts of this course are your group members most looking forward to in this class? List at least three.

- What parts of this course are your group members most worried about in this class? List at least three.

When you're done with the above, find another group that is also done...

Learn the names of everyone in that group. Compare your answers for the previous questions. Then, discuss and write down answers to the following questions.

- What is the number one thing your combined group is looking forward to about this class?
- What is the number one thing your combined group is worried about in this class?
- Write down at least one question about the course that you will ask Lucy when we come back together as a whole class.
